Dear Hiring Team at Enefit,

I'm applying for the Lead Product Manager role. I turn complex, multi-stakeholder systems into reliable, useful products and bring hands-on delivery experience in regulated contexts.

Relevant impact:

- Unified asset (5000+) and academic records (500+ docs/year) on the Entu platform, improving governance and UX.
- Led campus-wide IT operations for ≈700 users and migrated email to Google Mail, reducing maintenance load.
- Built OAuth.ee (ID-card + Mobile-ID) used in production, combining security, compliance, and smooth UX.
- Shipped eMem/memoriaal.ee data platform, balancing data quality, performance, and public access.

I work documentation-first, set clear success metrics, and drive outcome-focused iteration. I prioritize impact, de-risk scope, and create alignment across engineering and business. Enefit's green mission is one I'd be proud to support.

I'd welcome a short call to discuss how I can help your teams deliver customer-centered, scalable energy products.

Best regards,

Mihkel Putrinš
